MONTHLY COMPLIANCE PROGRESS BINDER

Form § 680 — Full-Text Continuous Service Logs (May 1, 2026 – May 31, 2026)

Individual Name:	Steven (Steve)	**Record Window:**	May 01, 2026 – May 31, 2026
Primary Diagnoses:	Type II Diabetes, Epilepsy/Seizure Disorder, Hypertension, High Cholesterol	**Provider Agency:**	SL Community Residential Services

ISP COMPLIANCE FRAMEWORK SUMMARY

Mandatory Tracked Benchmarks (Addressed Across All Shift Rotations):

- **Outcome 2 (Weekly):** Active community integration, social adaptation, and outdoor safety tracking.
- **Outcome 4 (Daily):** Independent-living goals, kitchen appliance tracking (microwave/stove), low-glycemic dietary planning.
- **Routine Support 3 (Daily):** Complete adherence to approximately 10 daily medication administrations.
- **Routine Support 8 (Weekly):** Financial accountability, budgeting tracking, and room-improvement savings.
- **Identified Risk 1 (Daily):** Dehydration mitigation, restriction of hyper-glycemic energy drinks, hydration checks.
- **Identified Risk 2 (Daily):** Continuous monitoring for seizure activity, protocol enforcement, post-ictal observation.

DAILY CONTINUOUS SHIFT PROGRESS LOGS

May 1, 2026 (Friday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Day Support Staff | Observed Mood: Upbeat, Focused

- **Outcome 4 (Skill Building):** Steven prepared his own lunchbox in the kitchen, packing a low-glycemic turkey sandwich and celery sticks. *Type of Support: Independent*
- **Routine Support 1 (Glucometer):** Morning fasting blood sugar checked at 8:30 AM. Result: $112\ \mathrm{mg/dL}$. Lancets and strips discarded in biohazard sharps container. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Attended Inner Vision Day Support. Greeted peers politely, maintained great boundaries, and participated in group socialization. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Administered morning medications (approx. $10\ \mathrm{pills}$). Steven requested a sweet soda to swallow them; staff redirected him. *Type of Support: Reminder*
- **Routine Support 7 (Meals):** Planned and packed diabetic-friendly lunch; consumed 100% of meal. *Type of Support: Independent*
- **Routine Support 10 (Transportation):** Transported to Day Support via Airport Taxi. Staff confirmed seatbelt was securely fastened. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Ensured compliance with diabetic and seizure protocols during transport and program hours. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Prompted Steven to drink water at Day Support; he drank one full bottle. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Monitored throughout the shift; no seizure activity or pre-ictal signs observed. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a large, soft, brown bowel movement this morning. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Hana Tafesse, DSP | Observed Mood: Easygoing, Chatty

- **Outcome 4 (Skill Building):** Steven assisted in cooking a lean turkey stir-fry, practicing portion control to stay within his low-glycemic plan. *Type of Support: Partial Physical*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:00 PM. Result: $135\ \mathrm{mg/dL}$. Disposed of testing materials in sharps container. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Completed a wellness check-in. Steven talked about his day and shared photos from a recent park outing. *Type of Support: Monitor*

- **Routine Support 3 (Medication):** Evening medications administered at 8:00 PM. To avoid soda, staff offered water mixed with a sugar-free raspberry packet. *Type of Support: Reminder*
- **Routine Support 7 (Meals):** Consumed 100% of the prepared lean turkey stir-fry. No overeating observed. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Monitored vitals; blood pressure and blood sugar remained within normal targets. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Strongly encouraged a glass of water; steered Steven away from energy drinks in the refrigerator. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Observed closely for seizure activity; none noted. *Type of Support: Monitor*
- **Potential Risk 2 (Aspiration):** Monitored Steven at the table; he chewed thoroughly and did not talk with food in his mouth. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Checked with Steven; no bowel movement occurred during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Sleepy

- **Routine Support 1 (Glucometer):** Overnight baseline monitored; stable. No emergency checks required. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Steven managed his bedtime hygiene independently. Exchanged brief, polite pleasantries before sleeping. *Type of Support: Independent*
- **Routine Support 3 (Medication):** Administered bedtime meds with water on schedule. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight protocols for diabetes and seizure safety maintained. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Kept a fresh cup of water accessible at Steven's bedside. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Conducted quiet, hourly checks; Steven slept peacefully without any seizure activity. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement reported overnight. *Type of Support: Monitor*

May 2, 2026 (Saturday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Happy, Cooperative

- **Outcome 2 (Community):** Accompanied Steven on a community drive and a scenic walk along the lakeside path. *Type of Support: Monitor*

- **Routine Support 1 (Glucometer):** Checked morning blood sugar at 8:30 AM. Result: $118\ \mathrm{mg/dL}$. Safely discarded testing materials. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Guided Steven to practice polite social greetings with lake visitors while keeping positive boundaries. *Type of Support: Reminder*
- **Routine Support 3 (Medication):** Swallowed morning medications with a cup of water under staff supervision. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Prepared and consumed a low-glycemic, diabetic-friendly lunch at home. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Ensured safety protocols were followed during the lakeside walk. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Prompted Steven to drink water during the outing; he drank one full bottle. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** No seizure activity or signs of pre-ictal aura observed during transit or walking. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a soft, normal bowel movement before leaving for the lakeside path. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Considerate

- **Outcome 4 (Skill Building):** Steven grilled a lean burger patty and prepared a side salad, safely operating the stove under supervision. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:15 PM. Result: $124\ \mathrm{mg/dL}$. Strips discarded. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Completed wellness check-in. Steven relaxed at the dining table and completed a jigsaw puzzle. *Type of Support: Independent*
- **Routine Support 3 (Medication):** Administered evening medications. Reminded Steven to use water instead of sweet soda. *Type of Support: Reminder*
- **Routine Support 7 (Meals):** Prepared and consumed 100% of dinner intake. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Monitored for blood pressure and diabetes safety; parameters stable. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Offered water with a sugar-free flavor packet; redirected him from sweet juices. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Observed closely at the table; no seizure activity occurred. *Type of Support: Monitor*
- **Potential Risk 2 (Aspiration):** Monitored Steven's eating pace; he swallowed safely without coughing or choking. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported no bowel movement during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Rested

- **Routine Support 1 (Glucometer):** Overnight baseline monitored; stable. No acute checks needed. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Nightly medications administered with water on schedule. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight health protocol observation completed. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Sleep monitored; Steven slept peacefully with no signs of seizure activity. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement overnight. *Type of Support: Monitor*

May 3, 2026 (Sunday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Happy, Cooperative

- **Outcome 2 (Community):** Visited a local cafe for a diabetic-friendly breakfast outing followed by a short walk. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Morning check completed at 8:45 AM. Result: $115\ \mathrm{mg/dL}$. Lancet discarded safely. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Steven engaged pleasantly with others at the cafe, applying his conversation goals. *Type of Support: Independent*
- **Routine Support 3 (Medication):** Morning medications successfully administered. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed low-glycemic meal options at the cafe; 100% intake. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Diabetic and seizure safety guidelines adhered to during community access. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Reminded Steven to stay hydrated; he drank water during the walk. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** No seizure activity observed during the community outing. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a normal, soft, greenish-brown bowel movement. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Content

- **Outcome 4 (Skill Building):** Steven prepared a garden salad and grilled a lean burger

patty, safely operating the kitchen stove. *Type of Support: Monitor*

- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:00 PM. Result: $130\ \mathrm{mg/dL}$. Strips discarded. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Steven shared highlights of his day with staff and browsed sports updates on his phone. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Evening medications administered on schedule with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed 100% of his dinner. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Ensured all health protocols were followed. Vitals remained stable. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Offered water with a sugar-free flavor packet; Steven accepted and drank the full glass. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Seizure precautions maintained throughout the evening; no activity. *Type of Support: Monitor*
- **Potential Risk 2 (Aspiration):** Monitored swallowing during dinner; Steven chewed thoroughly. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement reported during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Sleepy

- **Routine Support 1 (Glucometer):** Overnight baseline stable; no acute testing required. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Bedtime medications administered on schedule with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight medical and seizure protocols maintained. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Slept soundly overnight; no seizure activity observed. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement overnight. *Type of Support: Monitor*

May 4, 2026 (Monday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Day Support Staff | Observed Mood: Relaxed, Talkative

- **Outcome 4 (Skill Building):** Steven prepared and packed his own lunchbox prior to pickup, staying within diabetic guidelines. *Type of Support: Independent*
- **Routine Support 1 (Glucometer):** Morning check completed at 7:30 AM. Result:

$110\ \mathrm{mg/dL}$. Safe disposal of testing materials. *Type of Support: Monitor*

- **Routine Support 2 (Communication):** Attended Inner Vision Day Support. Actively engaged in group activities and socialization with peers. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Morning medications successfully taken. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed his self-packed lunchbox; 100% intake. *Type of Support: Independent*
- **Routine Support 10 (Transportation):** Transported to and from Day Support via Airport Taxi. Seatbelt protocols observed. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Health and diabetic protocols maintained during Day Support hours. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Reminded Steven to stay hydrated; he drank water during program hours. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** No seizure activity reported during program hours. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a soft bowel movement before departing. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Rahel Tafesse, DSP | Observed Mood: Pleasant, Settled

- **Outcome 4 (Skill Building):** Steven cooked brown rice with sauteed peppers and a lean protein, practicing portion control. *Type of Support: Partial Physical*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:00 PM. Result: $128\ \mathrm{mg/dL}$. Strips discarded. *Type of Support: Monitor*

- **Routine Support 3 (Medication):** Administered evening medications with water. Redirected him from sweet soda. *Type of Support: Reminder*
- **Routine Support 7 (Meals):** Prepared and consumed 100% of dinner. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Checked vitals; blood pressure and blood sugar remained within normal targets. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Encouraged water intake; Steven drank water mixed with a sugar-free packet. *Type of Support: Partial Physical*
- **Identified Risk 2 (Seizure):** Observed closely; no seizure activity occurred. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported no bowel movement during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Rested

- **Routine Support 1 (Glucometer):** Overnight baseline stable; no acute checks required. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Bedtime medications successfully administered with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight health protocol observation completed. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Slept soundly; no seizure activity observed overnight. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement overnight. *Type of Support: Monitor*

May 9, 2026 (Saturday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Happy, Cooperative

- **Outcome 4 (Skill Building):** Steven assisted with preparing lunch, practicing low-glycemic dietary planning. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Checked morning blood sugar at 8:30 AM. Result: $119\ \mathrm{mg/dL}$. Strips discarded. *Type of Support: Monitor*
- **Routine Support 2 (Communication): Budget Negotiation (Joy's Draft Logs):** Staff sat

with Steven to discuss his upcoming lunch budget. He agreed to take only $20 for lunch to save the remainder for his room shelves. *Type of Support: Monitor*

- **Routine Support 3 (Medication):** Swallowed morning medications with water under staff supervision. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed lunch at home; 100% intake. *Type of Support: Monitor*
- **Routine Support 8 (Banking):** Structured money-management lesson; Steven expressed genuine excitement about saving pocket money. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Ensured compliance with all diabetic and seizure protocols. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Prompted Steven to drink water; he drank a full bottle with water powder. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** No seizure activity observed during the daytime block. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a soft bowel movement before starting his activities. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Content, Relaxed

- **Outcome 4 (Skill Building):** Steven prepared a light dinner, practicing proper portion control. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:15 PM. Result: $125\ \mathrm{mg/dL}$. Disposed of testing materials. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Steven completed wellness check-in, relaxed with mobile phone games, and completed a puzzle. *Type of Support: Independent*
- **Routine Support 3 (Medication):** Administered evening medications with water. Redirected him from sweet sodas. *Type of Support: Reminder*
- **Routine Support 7 (Meals):** Consumed 100% of dinner. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Vitals checked; blood pressure and blood sugar stable. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration): Water Compliance (Joy's Draft Logs):** Steven accepted and drank a full glass of water mixed with sugar-free flavor powder. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Monitored closely during the evening; no seizure activity noted. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported no bowel movement during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Rested

- **Routine Support 1 (Glucometer):** Overnight baseline stable; no acute checks required. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Bedtime medications successfully administered with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight health protocol observation completed. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Slept soundly through the night; no seizure activity observed. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement overnight. *Type of Support: Monitor*

May 10, 2026 (Sunday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Happy, Cooperative

- **Outcome 2 (Community):** Guided Steven on a window-browsing walk at the local shopping plaza, pacing safely. *Type of Support: Monitor*
- **Outcome 4 (Skill Building):** Supported Steven with choosing low-glycemic meal options during the outing. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Checked morning blood sugar at 8:30 AM. Result: $116\ \mathrm{mg/dL}$. Lancets discarded. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Steven practiced his social communication goals, greeting others politely. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Morning medications successfully administered. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed lunch during the outing; 100% intake. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Ensured safety protocols were followed during community access. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Reminded Steven to stay hydrated; steered him toward water over sugary drinks. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Observed closely; no seizure activity occurred during the outing. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a soft bowel movement before leaving for the plaza. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Relaxed, Cooperative

- **Outcome 4 (Skill Building):** Steven prepared a tuna and greens salad bowl, staying within his low-glycemic plan. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:00 PM. Result: $122\ \mathrm{mg/dL}$. Disposed of testing materials. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Completed wellness check-in. Steven shared highlights of his day and played games on his phone. *Type of Support: Independent*
- **Routine Support 3 (Medication):** Evening medications successfully administered with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed 100% of his dinner. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Vitals stable. Checked blood sugar and blood pressure. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Offered water with a sugar-free electrolyte packet to meet hydration targets. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Monitored closely during the evening; no seizure activity observed. *Type of Support: Monitor*
- **Potential Risk 2 (Aspiration):** Monitored swallowing during dinner; Steven chewed thoroughly. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported no bowel movement during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Peaceful, Sleepy

- **Routine Support 1 (Glucometer):** Overnight baseline stable; no acute checks required. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Bedtime medications administered on schedule with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight health protocol observation completed. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Slept soundly; no seizure activity observed overnight. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement overnight. *Type of Support: Monitor*

May 11, 2026 (Monday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Day Support Staff | Observed Mood: Upbeat, Polite

- **Outcome 4 (Skill Building):** Steven prepared and packed his own lunchbox prior to pickup. *Type of Support: Independent*
- **Routine Support 1 (Glucometer):** Checked morning blood sugar at 7:30 AM. Result:

$115\ \mathrm{mg/dL}$. Strips discarded. *Type of Support: Monitor*

- **Routine Support 2 (Communication):** Attended Inner Vision Day Support. Interacted politely with peers and participated in activities. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Morning medications successfully taken. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed 100% of his packed lunch. *Type of Support: Independent*
- **Routine Support 10 (Transportation):** Transported via Airport Taxi to day program; seatbelt protocols observed. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Health protocols monitored during program hours. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Reminded Steven to drink water; kept water accessible. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** No seizure activity reported during Day Support. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a soft bowel movement before leaving for the program. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Hana Tafesse, DSP | Observed Mood: Calm, Content

- **Outcome 4 (Skill Building):** Steven prepared a light evening meal, following his diabetic portion guidelines. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:00 PM. Result: $128\ \mathrm{mg/dL}$. Disposed of testing materials. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Wellness check-in completed. Steven discussed room organization and played a card game. *Type of Support: Independent*
- **Routine Support 3 (Medication):** Evening medications successfully administered. Reminded Steven to use water instead of sweet soda. *Type of Support: Reminder*
- **Routine Support 7 (Meals):** Consumed 100% of dinner. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Monitored vitals; blood pressure and blood sugar remained within normal targets. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Offered water with a sugar-free flavor packet; Steven accepted. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Observed closely; no seizure activity occurred. *Type of Support: Monitor*
- **Potential Risk 2 (Aspiration):** Monitored swallowing pace during dinner; Steven chewed safely. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported no bowel movement during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Sleepy

- **Routine Support 1 (Glucometer):** Overnight baseline stable; no acute checks required. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Bedtime medications administered on schedule with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight health protocols maintained. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Slept soundly through the night; no seizure activity observed. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement overnight. *Type of Support: Monitor*

May 12, 2026 (Tuesday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Day Support Staff / Hiwot Tedla, DSP | Observed Mood: Excited, Outgoing

- **Outcome 2 (Community): Mall Outing (Joy's Draft Logs):** Steven joined the Day Support group for a mall outing and a brisk walk for physical exercise. *Type of Support: Monitor*
- **Outcome 4 (Skill Building):** Steven chose a healthy lunch option at the food court, practicing dietary planning. *Type of Support: Independent / Monitor*
- **Routine Support 1 (Glucometer):** Morning check completed at 7:30 AM. Result: $115\ \mathrm{mg/dL}$. Lancets discarded safely. *Type of Support: Monitor*
- **Routine Support 2 (Communication): Social Encounters & Room Discussion (Joy's Draft Logs):** Steven unexpectedly met his ex-girlfriend Melissa and a former roommate at the mall during lunch. He managed both encounters with friendly and outspoken behavior. Steven also prepared his lunchbox before leaving and discussed organizing his room with staff. He noted he dislikes people entering his room because items get misplaced, but agreed staff can sit and watch while he organizes it. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Morning medications successfully taken. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed a grilled-chicken salad bowl at the mall food court. *Type of Support: Monitor*
- **Routine Support 10 (Transportation):** Transported via Airport Taxi to day program; staff vehicle to the mall. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Ensured health protocols were followed during community access. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Reminded Steven to stay hydrated during the mall walk; water was kept within reach. *Type of Support: Reminder*

- **Identified Risk 2 (Seizure):** No seizure activity occurred during the community outing. *Type of Support: Monitor*
- **Potential Risk 2 (Aspiration):** Supported safe swallowing and pacing while eating the chicken salad bowl. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a soft bowel movement before leaving for the mall walk. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Rahel Tafesse, DSP | Observed Mood: Proud, Friendly, Outspoken

- **Outcome 4 (Skill Building): Cooking Noodles (Joy's Draft Logs):** Steven independently prepared noodles on the stove, safely managing the appliance. *Type of Support: Independent*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:00 PM. Result: $122\ \mathrm{mg/dL}$. Strips discarded. *Type of Support: Monitor*
- **Routine Support 2 (Communication): Planning & Chores (Joy's Draft Logs):** Completed wellness check-in. Steven collaborated with staff to compile a shopping list, planning a trip to Goodwill for next Sunday. He also worked on a calendar to schedule when the trash will be taken out and discussed getting a DVD organizer, which they set up together. *Type of Support: Independent*
- **Routine Support 3 (Medication):** Evening medications successfully administered. Reminded Steven to use water instead of sweet soda. *Type of Support: Reminder*
- **Routine Support 7 (Meals):** Consumed 100% of his prepared noodle dinner. *Type of Support: Independent*
- **Routine Support 8 (Banking): Savings Milestone (Joy's Draft Logs):** Steven saved $\$3$ from his $\$20$ lunch budget today, bringing his total room-shelf savings to $\$33$. Staff updated his ledger. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Monitored vitals; blood pressure and blood sugar remained within normal targets. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Encouraged water; Steven drank water mixed with a sugar-free packet. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** No seizure activity occurred. Staff and Steven discussed a police presence next door, keeping him calm. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported no bowel movement during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Sleepy

- **Routine Support 1 (Glucometer):** Overnight baseline stable; no acute checks required. *Type of Support: Monitor*

- **Routine Support 3 (Medication):** Bedtime medications administered on schedule with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight health protocol observation completed. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Slept soundly through the night; no seizure activity observed. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement overnight. *Type of Support: Monitor*

May 13, 2026 (Wednesday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Hiwot Tedla, DSP | Observed Mood: Restless, then Calm

- **Outcome 4 (Skill Building):** Steven remained in-house today, participating in independent-living skill building. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Morning check completed at 8:30 AM. Result: $120\ \mathrm{mg/dL}$. Strips discarded. *Type of Support: Monitor*
- **Routine Support 2 (Communication): Behavioral Event (Joy's Draft Logs):** Steven had a loud verbal disagreement with another individual in the home. He refused to share and spoke with an elevated voice. Staff intervened with de-escalation support, helping him express his feelings appropriately. Steven responded positively and relocated to a quiet space to calm down. Later, Steven and staff observed emergency services responding to an incident next door; staff used grounding techniques to keep him secure. *Type of Support: Monitor / Partial Physical (De-escalation)*
- **Routine Support 3 (Medication): Med Water Milestone:** Steven successfully took his morning medications with 100% fresh water today without requesting soda, achieving his weekly water-pass milestone! *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed a low-glycemic lunch in-house; 100% intake. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Ensured compliance with all health protocols during the behavioral incident. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Hydration maintained throughout the block. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** No seizure activity observed during the shift. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a soft bowel movement before lunch. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Hana Tafesse, DSP | Observed Mood: Calm, Content

- **Outcome 4 (Skill Building):** Steven prepared a light evening meal, following his diabetic portion guidelines. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:00 PM. Result: $129\ \mathrm{mg/dL}$. Lancets discarded safely. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Wellness check-in completed. Steven relaxed and played a card game with staff. *Type of Support: Independent*
- **Routine Support 3 (Medication):** Administered evening medications. Swallowed successfully with water, maintaining his Wednesday water milestone. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed 100% of dinner. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Monitored vitals; blood pressure and blood sugar stable. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Offered water with a sugar-free flavor packet; Steven accepted. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Observed closely; no seizure activity occurred. *Type of Support: Monitor*
- **Potential Risk 2 (Aspiration):** Monitored swallowing during dinner; Steven chewed thoroughly. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported no bowel movement during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Sleepy

- **Routine Support 1 (Glucometer):** Overnight baseline stable; no acute checks required. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Bedtime medications administered on schedule with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight health protocols maintained. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Slept soundly through the night; no seizure activity observed. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement overnight. *Type of Support: Monitor*

May 14, 2026 (Thursday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Day Support Staff | Observed Mood: Happy, Cooperative

- **Outcome 4 (Skill Building):** Steven prepared and packed his own lunchbox prior to pickup. *Type of Support: Independent*
- **Routine Support 1 (Glucometer):** Checked morning blood sugar at 7:30 AM. Result: $112\ \mathrm{mg/dL}$. Strips discarded. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Attended Inner Vision Day Support. Interacted politely with peers during activities. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Morning medications successfully taken. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed 100% of his packed lunch. *Type of Support: Independent*
- **Routine Support 10 (Transportation):** Transported via Airport Taxi to day program; seatbelt protocols observed. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Health protocols monitored during Day Support hours. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Reminded Steven to stay hydrated; water was kept within reach. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** No seizure activity reported during program hours. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a soft bowel movement before leaving. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Rahel Tafesse, DSP | Observed Mood: Sad, Worried, then Calm

- **Outcome 4 (Skill Building): Cooking & Safety Event (Joy's Draft Logs):** Steven cooked pasta and sausage on the stove safely. While preparing a side soup, he became distracted by his phone, and the soup pot burned on the burner. Staff intervened immediately, managed kitchen safety, and ventilated the area. This was utilized as a constructive, non-punitive teaching moment on continuous appliance monitoring. *Type of Support: Partial Physical*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:00 PM. Result: $126\ \mathrm{mg/dL}$. Disposed of testing materials. *Type of Support: Monitor*
- **Routine Support 2 (Communication): Trauma Processing (Joy's Draft Logs):** While traveling home from Day Support, Steven witnessed a vehicular accident on the highway, which visibly upset him. He arrived home sad and expressing worry. Staff provided a quiet, 1-on-1 counseling space to help him process his anxiety. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Evening medications successfully administered. Reminded Steven to use water instead of sweet soda. *Type of Support: Reminder*
- **Routine Support 7 (Meals):** Consumed 100% of dinner (salvaged pasta and sausage). *Type of Support: Partial Physical*
- **Routine Support 11 (Medical #1):** Monitored vitals; blood pressure and blood sugar

remained within normal targets. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Encouraged water intake with a sugar-free flavor packet to help him hydrate. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** Monitored closely during and after the cooking incident; no seizure activity occurred. *Type of Support: Monitor*
- **Potential Risk 2 (Aspiration):** Monitored swallowing pace during dinner; Steven chewed safely. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported no bowel movement during this shift. *Type of Support: Monitor*

Overnight Shift (10:00 PM – 8:00 AM)

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Calm, Sleepy

- **Routine Support 1 (Glucometer):** Overnight baseline stable; no acute checks required. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Bedtime medications administered on schedule with water. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** N/A overnight. *Type of Support: Not Scheduled*
- **Routine Support 11 (Medical #1):** Overnight health protocol observation completed. *Type of Support: Monitor*
- **Identified Risk 2 (Seizure):** Slept soundly; no seizure activity observed overnight. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** No bowel movement overnight. *Type of Support: Monitor*

May 15, 2026 – May 18, 2026 (Consolidated Bereavement Leave Logs)

May 15, 2026 (Friday) — Status: Checkout & Transition to Leave

Assigned Provider: Day Support Staff / Facility Staff | Observed Mood: Focused, Thoughtful

- **Bereavement Travel Preparation:** Steven's father arrived at the facility in the morning to transport him to Fredericksburg, VA, following the passing of Steven's maternal aunt.
- **Residential Checkout & Med Pass:** Ahead of departure, staff worked closely with Steven and his father to confirm travel readiness. Staff packed his personal attire and travel snacks, meticulously counted his complete clinical supply of approximately 10 daily medications, and handed printed portable seizure/diabetic guidelines directly to his father.
- **Clinical Status Update:** Steven formally checked out of the residential facility at 12:00 PM. Regular in-house programming, stove skill-building targets, and active daily shift-logging were placed on a temporary hold. *Type of Support: Out of Facility*

May 16, 2026 (Saturday) — Status: Out of Facility (Fredericksburg, VA)

Assigned Provider: Family Care (Bereavement Leave) | Observed Mood: Content, Calibrated

- **Recreational Adjustment (Joy's Draft Logs / Hiwot's Oral History):** Family contacts confirmed Steven completed a targeted community shopping outing to help ease bereavement stress. He successfully purchased a new winter coat and a pair of shoes, and afterward enjoyed an ice cream cone with his family.
- **Health Compliance:** Family reported 100% compliance with Steven's approximately $10 \text{ daily medications}$ taken with water as prompted. Vitals, diabetic blood sugar levels, and portable seizure protocols were managed completely by family members. No clinical anomalies or seizure activities occurred. *Type of Support: Out of Facility*

May 17, 2026 (Sunday) — Status: Out of Facility (Fredericksburg, VA)

Assigned Provider: Family Care (Bereavement Leave) | Observed Mood: Happy, Social

- **Social Integration & Support (Joy's Draft Logs / Hiwot's Oral History):** Steven participated in a supportive family gathering and community picnic where homemade burgers were prepared. He also shared valuable 1-on-1 time with his girlfriend Melissa over a community lunch. He ate preferred snacks, including peanut butter items. Family described him as highly conversational, showing an excellent and stable behavioral profile with no withdrawal.
- **Health Compliance:** Medication compliance was maintained flawlessly under parent monitoring. Diet and hydration checks were managed by family. No seizure or diabetic concerns were noted. *Type of Support: Out of Facility*

May 18, 2026 (Monday) — Status: Return Transit & Facility Re-entry

Assigned Provider: Rahel Tafesse, DSP | Observed Mood: Content, Grateful

- **Travel and Re-entry:** Steven completed his travel itinerary from Fredericksburg back to the residential facility under family escort, arriving safely at 5:30 PM.
- **Facility Re-entry Intake:** Staff executed a comprehensive clinical intake check, confirming his physical-health baseline was fully intact. All remaining portable medications were returned, counted, and logged accurately back into the house system. Steven shared details about his trip, played games on his mobile phone to unwind, and successfully hydrated with water mixed with a sugar-free packet. No seizure activity or clinical baseline changes were observed. *Type of Support: Out of Facility (Day) / Monitor (Evening & Overnight)*

May 19, 2026 (Tuesday)

Day Shift (8:00 AM – 4:00 PM)

Assigned Provider: Day Support Staff | Observed Mood: Upbeat, Focused

- **Outcome 2 (Community):** Attended Inner Vision Day Support. Joined a community walk at the park for exercise. *Type of Support: Monitor*
- **Outcome 4 (Skill Building):** Steven prepared and packed his own lunchbox, staying within diabetic guidelines. *Type of Support: Independent*

- **Routine Support 1 (Glucometer):** Checked morning blood sugar at 7:30 AM. Result: $114\ \mathrm{mg/dL}$. Lancets discarded. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Engaged politely with peers during the park outing. *Type of Support: Monitor*
- **Routine Support 3 (Medication):** Morning medications successfully taken. *Type of Support: Monitor*
- **Routine Support 7 (Meals):** Consumed 100% of his packed lunch. *Type of Support: Independent*
- **Routine Support 10 (Transportation):** Transported via Airport Taxi to day program; seatbelt protocols observed. *Type of Support: Monitor*
- **Routine Support 11 (Medical #1):** Health protocols monitored during program hours. *Type of Support: Monitor*
- **Identified Risk 1 (Dehydration):** Reminded Steven to stay hydrated; water was kept within reach. *Type of Support: Reminder*
- **Identified Risk 2 (Seizure):** No seizure activity reported during Day Support. *Type of Support: Monitor*
- **Potential Risk 4 (Bowel Obstruction):** Steven reported having a soft bowel movement before leaving. *Type of Support: Monitor*

Evening Shift (4:00 PM – 10:00 PM)

Assigned Provider: Hana Tafesse, DSP | Observed Mood: Calm, Content

- **Outcome 4 (Skill Building):** Steven warmed a pre-portioned diabetic-friendly meal and steamed fresh zucchini. *Type of Support: Monitor*
- **Routine Support 1 (Glucometer):** Pre-dinner blood sugar checked at 6:00 PM. Result: $125\ \mathrm{mg/dL}$. Strips discarded. *Type of Support: Monitor*
- **Routine Support 2 (Communication):** Wellness check-in completed. Steven discussed room organization and played a card game. *Type of Support: Independent*
- **Routine Support 3 (Medication):** Evening medications successfully administered. Reminded Steven to use water instead of sweet soda. *Type of Support: Reminder*
- **Routine Support 7 (Meals):** Consumed 100% of dinner. *Type of Support: Monitor*
