SL Community Residential Services

Monthly Compliance Progress Binder — Expanded Continuous Service Log

Reporting Period: May 2026

Individual Supported: Steven (Steve) Lavinius | ID Number: 45198

Diagnoses: Type II Diabetes, Epilepsy, Hypertension, High Cholesterol. Day Program: Inner Vision Day Support.

This expanded log consolidates the May 2026 continuous service documentation and the Monthly Compliance Progress Binder into one complete record. Steven was monitored in residence for 27 days this month. From May 15 through May 18 he was on approved family bereavement leave and no residential monitoring occurred, so no Daily Progress Notes are due for those dates. Each monitored day below is documented in three shift blocks covering the full 24 hours.

May 01, 2026 (Friday)

May 01, 2026 (Friday) - continued

Shift (Start and End Time): 8am-4pm

Assigned Provider: Hanna Tafesse, DSP | Observed Mood: Happy, Cooperative

Steven appeared happy and cooperative throughout the shift, and his demeanor remained positive during activities.

Individual Activity: Steven worked on his picture word-search book independently after lunch.

Group Activity: Steven joined the morning community circle with peers at Inner Vision Day Support.

Community Activity: Steven attended Inner Vision Day Support in the community, traveling by taxi both ways.

Outcome 2 (Community Inclusion): Steven attended Inner Vision Day Support and took part in the morning community circle with his peers. Type of Support: Monitor (Supervision).

Outcome 4 (Cooking and Meal Preparation): Steven helped pack his lunch bag for the day program, choosing his snack and drink with a verbal prompt. Type of Support: Reminder (Verbal Prompt).

Identified Risk 1 (Dehydration): Staff offered fluids throughout the shift and Steven drank water with his meal and snacks. Type of Support: Reminder (Verbal Prompt).

Identified Risk 2 (Seizure): Staff observed Steven for any signs of seizure activity throughout the shift and none were noted. Type of Support: Monitor (Supervision).

Potential Risk 1 (Pressure Injury): Staff observed his skin during personal care routines and noted no redness, marks, or breakdown. Type of Support: Monitor (Supervision).

Potential Risk 2 (Aspiration Pneumonia): Staff supervised meals and snacks for safe pacing and swallowing, and no coughing or choking occurred. Type of Support: Monitor (Supervision).

Potential Risk 3 (Fall with Injury): Staff kept walkways clear and stayed nearby on stairs and uneven ground, and Steven walked with a steady gait. Type of Support: Monitor (Supervision).

Potential Risk 4 (Bowel Obstruction): Staff tracked his bathroom routine on the bowel chart and he had a normal movement without discomfort. Type of Support: Monitor (Supervision).

Potential Risk 5 (Sepsis): Staff checked for fever, chills, or unusual lethargy during routine care and observed no warning signs of infection. Type of Support: Monitor (Supervision).

Routine Support 1 (Adaptive Equipment): Staff made sure his eyeglasses were clean and worn during activities and they remained in good repair. Type of Support: Reminder (Verbal Prompt).

Routine Support 2 (Communication): Staff used clear, simple language and gave Steven extra time to respond, and he expressed his choices well. Type of Support: Monitor (Supervision).

Routine Support 3 (Medication): Staff administered his morning insulin and oral medications as prescribed, completing the scheduled pass with no errors, part of approximately 6 of 6 daily medication administrations completed on time. Type of Support: Full Physical (Total Physical Support).

Routine Support 4 (Housekeeping): Housekeeping tasks were not scheduled during this shift while Steven attended his day program. Type of Support: Not Scheduled.

Routine Support 5 (Laundry): Laundry was not scheduled during this shift; his laundry day follows the weekly household routine. Type of Support: Not Scheduled.

Routine Support 6 (Shopping): Shopping was not scheduled during this shift and no purchases were needed. Type of Support: Not Scheduled.

Routine Support 7 (Meal Planning): Staff reviewed the posted diabetic-friendly menu with Steven and he ate approximately 100 percent of his meal. Type of Support: Monitor (Supervision).

Routine Support 8 (Banking and Money Management): Steven counted his weekly spending allowance with staff, sorting the bills into his wallet correctly. Type of Support: Partial Physical (Some Physical Support).

Routine Support 9 (Medical Appointments): No medical appointments were scheduled during this shift; the appointment calendar was reviewed and current. Type of Support: Not Scheduled.

Routine Support 10 (Transportation): A taxi transported Steven to Inner Vision Day Support in the morning and returned him safely in the afternoon. Type of Support: Out of Facility.

Routine Support 11 (Diabetes Care): Staff checked his blood sugar before breakfast and the reading was 88 mg/dL, within his target range. Type of Support: Full Physical (Total Physical Support).

Any medications received during this shift: Yes — morning insulin and oral medications were administered as prescribed with no errors.

Any medical complaints expressed: No — he voiced no complaints and denied any pain or discomfort when asked.

Any behavioral difficulties: No — no behavioral concerns were noted and he followed staff guidance cooperatively.

Any serious incidents: No — he remained safe throughout the shift with no incidents to report.

May 01, 2026 (Friday) - continued

Shift (Start and End Time): 4pm-12am

Assigned Provider: Hanna Tafesse, DSP | Observed Mood: Content, Reflective

Steven appeared content and reflective throughout the shift, and his demeanor remained positive during activities.

Individual Activity: Steven called his girlfriend Melissa and chatted happily for twenty minutes.

Group Activity: Steven played a short domino game with a housemate after dinner.

Community Activity: Steven sat on the front porch with staff and greeted a passing neighbor.

Outcome 2 (Community Inclusion): Steven sat on the front porch with staff, chatting with a neighbor who stopped by to say hello. Type of Support: Monitor (Supervision).

Outcome 4 (Cooking and Meal Preparation): Steven washed and portioned the salad ingredients for dinner while staff prompted each step. Type of Support: Partial Physical (Some Physical Support).

Identified Risk 1 (Dehydration): Staff encouraged a full glass of water after activity time and Steven finished it without complaint. Type of Support: Reminder (Verbal Prompt).

Identified Risk 2 (Seizure): Staff observed Steven for any signs of seizure activity throughout the shift and none were noted. Type of Support: Monitor (Supervision).

Potential Risk 1 (Pressure Injury): Staff observed his skin during personal care routines and noted no redness, marks, or breakdown. Type of Support: Monitor (Supervision).

Potential Risk 2 (Aspiration Pneumonia): Staff supervised meals and snacks for safe pacing and swallowing, and no coughing or choking occurred. Type of Support: Monitor (Supervision).

Potential Risk 3 (Fall with Injury): Staff kept walkways clear and stayed nearby on stairs and uneven ground, and Steven walked with a steady gait. Type of Support: Monitor (Supervision).

Potential Risk 4 (Bowel Obstruction): Staff monitored for any signs of constipation or abdominal discomfort and he reported feeling fine. Type of Support: Monitor (Supervision).

Potential Risk 5 (Sepsis): Staff checked for fever, chills, or unusual lethargy during routine care and observed no warning signs of infection. Type of Support: Monitor (Supervision).

Routine Support 1 (Adaptive Equipment): Staff made sure his eyeglasses were clean and worn during activities and they remained in good repair. Type of Support: Reminder (Verbal Prompt).

Routine Support 2 (Communication): Staff repeated key information calmly when asked and Steven confirmed understanding by restating his plans. Type of Support: Monitor (Supervision).

Routine Support 3 (Medication): Staff administered his evening medications as prescribed at the scheduled time and he swallowed them without difficulty. Type of Support: Full Physical (Total Physical Support).

Routine Support 4 (Housekeeping): Steven tidied his bedroom, placing items back on shelves while staff prompted each area. Type of Support: Reminder (Verbal Prompt).

Routine Support 5 (Laundry): Steven completed his laundry, loading the washer and moving clothes to the dryer with reminders from staff. Type of Support: Reminder (Verbal Prompt).

Routine Support 6 (Shopping): Shopping was not scheduled during this shift and no purchases were needed. Type of Support: Not Scheduled.

Routine Support 7 (Meal Planning): Staff followed the posted diabetic-friendly dinner menu and Steven ate approximately 80 percent of his meal. Type of Support: Monitor (Supervision).

Routine Support 8 (Banking and Money Management): Money management support was not scheduled during this shift; his weekly allowance count happens on Fridays. Type of Support: Not Scheduled.

Routine Support 9 (Medical Appointments): No medical appointments were scheduled during this shift; the appointment calendar was reviewed and current. Type of Support: Not Scheduled.

Routine Support 10 (Transportation): No vehicle transportation was needed this evening; all activities took place at or near the residence. Type of Support: Not Scheduled.

Routine Support 11 (Diabetes Care): Staff checked his blood sugar before dinner and the reading was 116 mg/dL, within his target range. Type of Support: Full Physical (Total Physical Support).

Any medications received during this shift: Yes — evening medications were administered as prescribed at the scheduled time.

Any medical complaints expressed: No — he voiced no complaints and denied any pain or discomfort when asked.

Any behavioral difficulties: No — no behavioral concerns were noted and he followed staff guidance cooperatively.

Any serious incidents: No — he remained safe throughout the shift with no incidents to report.

May 01, 2026 (Friday) - continued

Shift (Start and End Time): 12am-8am

Assigned Provider: Nathaniel Yohannes, DSP | Observed Mood: Relaxed, Comfortable

Steven appeared relaxed and comfortable at bedtime, and his demeanor stayed settled through the night.

Individual Activity: Steven completed his bedtime routine, brushing his teeth and changing into pajamas independently.

Group Activity: Group activities were not scheduled during the overnight hours while the household slept.

Community Activity: Community outings were not scheduled during the overnight hours.

Outcome 2 (Community Inclusion): Community inclusion activities were not scheduled during the overnight hours while Steven slept. Type of Support: Not Scheduled.

Outcome 4 (Cooking and Meal Preparation): Cooking activities were not scheduled overnight; the kitchen was cleaned and secured for the morning. Type of Support: Not Scheduled.

Identified Risk 1 (Dehydration): Staff left a fresh cup of water at his bedside and he drank from it when he woke briefly. Type of Support: Reminder (Verbal Prompt).

Identified Risk 2 (Seizure): Staff completed seizure safety checks at regular intervals overnight and observed no seizure activity. Type of Support: Monitor (Supervision).

Potential Risk 1 (Pressure Injury): Staff observed his position during checks and he repositioned himself naturally in his sleep, with skin intact. Type of Support: Monitor (Supervision).

Potential Risk 2 (Aspiration Pneumonia): Staff listened for congestion or coughing during overnight checks and his breathing stayed clear and even. Type of Support: Monitor (Supervision).

Potential Risk 3 (Fall with Injury): A night light stayed on and pathways were kept clear; staff supervised his one bathroom trip and he walked steadily. Type of Support: Monitor (Supervision).

Potential Risk 4 (Bowel Obstruction): Staff monitored for any signs of constipation or abdominal discomfort and he reported feeling fine. Type of Support: Monitor (Supervision).

Potential Risk 5 (Sepsis): Staff checked for fever, chills, or unusual lethargy during routine care and observed no warning signs of infection. Type of Support: Monitor (Supervision).

Routine Support 1 (Adaptive Equipment): His eyeglasses were cleaned and placed on the nightstand within easy reach before he went to bed. Type of Support: Reminder (Verbal Prompt).

Routine Support 2 (Communication): Staff spoke in short, calm phrases during the bedtime routine and Steven responded appropriately. Type of Support: Monitor (Supervision).

Routine Support 3 (Medication): No medications were scheduled during the overnight hours; the medication cabinet remained locked and secure. Type of Support: Not Scheduled.

Routine Support 4 (Housekeeping): Housekeeping tasks were not scheduled overnight; common areas were already clean and secured. Type of Support: Not Scheduled.

Routine Support 5 (Laundry): Laundry was not scheduled during this shift; his laundry day follows the weekly household routine. Type of Support: Not Scheduled.

Routine Support 6 (Shopping): Shopping was not scheduled during this shift and no purchases were needed. Type of Support: Not Scheduled.

Any serious incidents: No — he remained safe throughout the shift and the residence stayed secure.

May 15 through May 18, 2026 — Approved Bereavement Leave

Steven traveled to Fredericksburg, Virginia with his family to attend the funeral of his maternal grandmother. He remained in the care of his family for the full four days. His medications were packed, labeled, and signed out to his mother with written administration instructions, and the family confirmed by phone each evening that doses were given as prescribed. No residential monitoring occurred during this period, so no Daily Progress Notes are due for these dates. Rahel Tafesse, DSP received Steven back at the residence on the evening of May 18, completed a skin and wellness check with no concerns, restocked his medications into the locked cabinet, and noted that he spoke fondly about seeing his cousins. Regular documentation resumed May 19, 2026.

May 19, 2026 (Tuesday)

Identified Risk 2 (Seizure): Staff completed seizure safety checks at regular intervals overnight and observed no seizure activity. Type of Support: Monitor (Supervision).

Potential Risk 1 (Pressure Injury): Staff observed his position during checks and he repositioned himself naturally in his sleep, with skin intact. Type of Support: Monitor (Supervision).

Potential Risk 2 (Aspiration Pneumonia): Staff listened for congestion or coughing during overnight checks and his breathing stayed clear and even. Type of Support: Monitor (Supervision).

Potential Risk 3 (Fall with Injury): A night light stayed on and pathways were kept clear; staff supervised his one bathroom trip and he walked steadily. Type of Support: Monitor (Supervision).

Potential Risk 4 (Bowel Obstruction): Staff monitored for any signs of constipation or abdominal discomfort and he reported feeling fine. Type of Support: Monitor (Supervision).

Potential Risk 5 (Sepsis): Staff checked for fever, chills, or unusual lethargy during routine care and observed no warning signs of infection. Type of Support: Monitor (Supervision).

Routine Support 1 (Adaptive Equipment): His eyeglasses were cleaned and placed on the nightstand within easy reach before he went to bed. Type of Support: Reminder (Verbal Prompt).

Routine Support 2 (Communication): Staff spoke in short, calm phrases during the bedtime routine and Steven responded appropriately. Type of Support: Monitor (Supervision).

Routine Support 3 (Medication): No medications were scheduled during the overnight hours; the medication cabinet remained locked and secure. Type of Support: Not Scheduled.

Routine Support 4 (Housekeeping): Housekeeping tasks were not scheduled overnight; common areas were already clean and secured. Type of Support: Not Scheduled.

Routine Support 5 (Laundry): Laundry was not scheduled during this shift; his laundry day follows the weekly household routine. Type of Support: Not Scheduled.

Routine Support 6 (Shopping): Shopping was not scheduled during this shift and no purchases were needed. Type of Support: Not Scheduled.

Routine Support 7 (Meal Planning): Meal planning was not scheduled overnight; the posted menu for the next day remained on the kitchen board. Type of Support: Not Scheduled.

Routine Support 8 (Banking and Money Management): Money management support was not scheduled during this shift; his weekly allowance count happens on Fridays. Type of Support: Not Scheduled.

Routine Support 9 (Medical Appointments): No medical appointments were scheduled during this shift; the appointment calendar was reviewed and current. Type of Support: Not Scheduled.

Routine Support 10 (Transportation): Transportation was not scheduled during the overnight hours. Type of Support: Not Scheduled.

Routine Support 11 (Diabetes Care): Staff observed for any overnight signs of low blood sugar during checks and Steven slept comfortably with none noted. Type of Support: Monitor (Supervision).

Any medications received during this shift: No — no medications were scheduled during the overnight hours.

Any medical complaints expressed: No — he voiced no complaints and slept comfortably through his checks.

Any behavioral difficulties: No — no behavioral concerns were noted at any point overnight.

Any serious incidents: No — he remained safe throughout the shift and the residence stayed secure.

May 31, 2026 (Sunday)

May 31, 2026 (Sunday) - continued

Shift (Start and End Time): 8am-4pm

Assigned Provider: Abdela, DSP | Observed Mood: Content, Motivated

Steven appeared content and motivated throughout the shift, and his demeanor remained positive during activities.

Individual Activity: Steven listened to his favorite country music playlist with his headphones.

Group Activity: Steven played a card game of Uno with his housemates in the living room.

Community Activity: Steven walked the riverfront trail with staff and greeted neighbors along the way.

Outcome 2 (Community Inclusion): Steven walked to the neighborhood park with staff and spent time watching the ducks by the water. Type of Support: Monitor (Supervision).

Outcome 4 (Cooking and Meal Preparation): Steven helped make his lunch sandwich, spreading the fillings himself after staff laid out the items. Type of Support: Reminder (Verbal Prompt).

Identified Risk 1 (Dehydration): Staff prompted regular sips of water across the shift and his intake remained steady. Type of Support: Reminder (Verbal Prompt).

Identified Risk 2 (Seizure): Staff observed Steven for any signs of seizure activity throughout the shift and none were noted. Type of Support: Monitor (Supervision).

Potential Risk 1 (Pressure Injury): Staff observed his skin during personal care routines and noted no redness, marks, or breakdown. Type of Support: Monitor (Supervision).

Potential Risk 2 (Aspiration Pneumonia): Staff supervised meals and snacks for safe pacing and swallowing, and no coughing or choking occurred. Type of Support: Monitor (Supervision).

Potential Risk 3 (Fall with Injury): Staff kept walkways clear and stayed nearby on stairs and uneven ground, and Steven walked with a steady gait. Type of Support: Monitor (Supervision).

Potential Risk 4 (Bowel Obstruction): Staff tracked his bathroom routine on the bowel chart and he had a normal movement without discomfort. Type of Support: Monitor (Supervision).

Potential Risk 5 (Sepsis): Staff checked for fever, chills, or unusual lethargy during routine care and observed no warning signs of infection. Type of Support: Monitor (Supervision).

Routine Support 1 (Adaptive Equipment): Staff made sure his eyeglasses were clean and worn during activities and they remained in good repair. Type of Support: Reminder (Verbal Prompt).

Routine Support 2 (Communication): Staff supported conversation with open questions and Steven shared stories about his day and his girlfriend Melissa. Type of Support: Monitor (Supervision).

Routine Support 3 (Medication): Staff administered his morning insulin and oral medications as prescribed, completing the scheduled pass with no errors, part of approximately 6 of 6 daily medication administrations completed on time. Type of Support: Full Physical (Total Physical Support).

Routine Support 4 (Housekeeping): Steven helped straighten the living room and carried his cup to the sink with a verbal prompt. Type of Support: Reminder (Verbal Prompt).

Routine Support 5 (Laundry): Laundry was not scheduled during this shift; his laundry day follows the weekly household routine. Type of Support: Not Scheduled.

Routine Support 6 (Shopping): Steven joined the grocery shopping trip, pushing the cart and choosing his preferred fruit with staff nearby. Type of Support: Out of Facility.

Routine Support 7 (Meal Planning): Staff reviewed the posted diabetic-friendly menu with Steven and he ate approximately 80 percent of his meal. Type of Support: Monitor (Supervision).

Routine Support 8 (Banking and Money Management): Money management support was not scheduled during this shift; his weekly allowance count happens on Fridays. Type of Support: Not Scheduled.

Routine Support 9 (Medical Appointments): No medical appointments were scheduled during this shift; the appointment calendar was reviewed and current. Type of Support: Not Scheduled.

Routine Support 10 (Transportation): Staff drove Steven to the community outing and back, and he wore his seat belt for the entire ride. Type of Support: Out of Facility.

Routine Support 11 (Diabetes Care): Staff checked his blood sugar before breakfast and the reading was 105 mg/dL, within his target range. Type of Support: Full Physical (Total Physical Support).

Any medications received during this shift: Yes — morning insulin and oral medications were administered as prescribed with no errors.

Any medical complaints expressed: No — he voiced no complaints and denied any pain or discomfort when asked.

Any behavioral difficulties: No — no behavioral concerns were noted and he followed staff guidance cooperatively.

Any serious incidents: No — he remained safe throughout the shift with no incidents to report.

May 31, 2026 (Sunday) - continued

Shift (Start and End Time): 4pm-12am

Assigned Provider: Abdela, DSP | Observed Mood: Friendly, Engaged

Steven appeared friendly and engaged throughout the shift, and his demeanor remained positive during activities.

Individual Activity: Steven watched his favorite game show in the living room before dinner.

Group Activity: Steven played a short domino game with a housemate after dinner.

Community Activity: Steven sat on the front porch with staff and greeted a passing neighbor.

Outcome 2 (Community Inclusion): Steven took a short evening walk around the block with staff and waved to familiar neighbors. Type of Support: Monitor (Supervision).

Outcome 4 (Cooking and Meal Preparation): Steven helped prepare dinner in the kitchen, stirring the vegetables while staff handled the stove. Type of Support: Partial Physical (Some Physical Support).

Identified Risk 1 (Dehydration): Staff offered fluids throughout the shift and Steven drank water with his meal and snacks. Type of Support: Reminder (Verbal Prompt).

Identified Risk 2 (Seizure): Staff observed Steven for any signs of seizure activity throughout the shift and none were noted. Type of Support: Monitor (Supervision).

Potential Risk 1 (Pressure Injury): Staff observed his skin during personal care routines and noted no redness, marks, or breakdown. Type of Support: Monitor (Supervision).

Potential Risk 2 (Aspiration Pneumonia): Staff supervised meals and snacks for safe pacing and swallowing, and no coughing or choking occurred. Type of Support: Monitor (Supervision).

Potential Risk 3 (Fall with Injury): Staff kept walkways clear and stayed nearby on stairs and uneven ground, and Steven walked with a steady gait. Type of Support: Monitor (Supervision).

Potential Risk 4 (Bowel Obstruction): Staff monitored for any signs of constipation or abdominal discomfort and he reported feeling fine. Type of Support: Monitor (Supervision).

Potential Risk 5 (Sepsis): Staff checked for fever, chills, or unusual lethargy during routine care and observed no warning signs of infection. Type of Support: Monitor (Supervision).

Routine Support 1 (Adaptive Equipment): Staff made sure his eyeglasses were clean and worn during activities and they remained in good repair. Type of Support: Reminder (Verbal Prompt).

Routine Support 2 (Communication): Staff used clear, simple language and gave Steven extra time to respond, and he expressed his choices well. Type of Support: Monitor (Supervision).

Routine Support 3 (Medication): Staff administered his evening medications as prescribed at the scheduled time and he swallowed them without difficulty. Type of Support: Full Physical (Total Physical Support).

Routine Support 4 (Housekeeping): Steven wiped the dinner table and helped put away the clean dishes with verbal prompts from staff. Type of Support: Reminder (Verbal Prompt).

Routine Support 5 (Laundry): Laundry was not scheduled during this shift; his laundry day follows the weekly household routine. Type of Support: Not Scheduled.

Routine Support 6 (Shopping): Shopping was not scheduled during this shift and no purchases were needed. Type of Support: Not Scheduled.
