Sample Residential Services Provider

Monthly Continuous Service Log — May 2026

This is a synthetic sample report for demonstration purposes. Each day below is divided into Day, Evening and Overnight shift blocks.

May 01, 2026 (Friday)

Shift (Start and End Time): 8am-4pm

Assigned Provider: Alex Morgan, DSP | Observed Mood: Happy, Outgoing

Day Program and Community Walk: A taxi picked the individual up at 7:45 AM for the day support program. Staff at the center reported he was cheerful and chatty with peers throughout the morning session. After lunch, staff supported a short community walk in the park, and he greeted neighbors politely (Outcome 2). Staff encouraged him to drink a full glass of water after the walk to stay hydrated (Risk 1). He returned to the residence safely by taxi at 4:00 PM.

Shift (Start and End Time): 4pm-12am

Assigned Provider: Jordan Lee, DSP | Observed Mood: Calm, Content

Evening Cooking Practice: The individual helped prepare dinner in the kitchen, practicing safe knife handling while staff provided verbal prompts (Outcome 4). Staff administered his evening medications at the scheduled time (Routine Support 3). After dinner he completed his laundry with reminders from staff (Routine Support 5). Staff observed him during the meal for any seizure or swallowing difficulty (Risk 2); none was noted.

Shift (Start and End Time): 12am-8am

Assigned Provider: Sam Rivera, DSP | Observed Mood: Calm, Sleepy

Overnight Observation: The individual completed his bedtime routine independently and went to bed on time. Staff conducted routine overnight safety checks every hour, monitoring respiration and seizure status (Risk 2). He slept soundly through the night with no disruptions and no concerns were noted.

May 02, 2026 (Saturday)

Shift (Start and End Time): 8am-4pm

Assigned Provider: Alex Morgan, DSP | Observed Mood: Excited, Friendly

Weekend Shopping Outing: Staff supported the individual on a shopping trip to the mall (Outcome 2, Routine Support 6). He selected his own items and paid at the register with partial physical support at the card terminal. He was excited and friendly with store staff. Staff reminded him to drink fluids during the outing (Risk 1). The drive back was calm and he helped carry the bags inside (Routine Support 10).

Shift (Start and End Time): 4pm-12am

Assigned Provider: Jordan Lee, DSP | Observed Mood: Content, Cooperative

Housekeeping and Meal Planning: The individual vacuumed his room and wiped the kitchen counters with staff supervision (Routine Support 4). Together with staff he planned meals for the coming week, choosing balanced options per his dietary plan (Outcome 4, Routine Support 7). Staff administered evening medications on schedule (Routine Support 3). No medical complaints were voiced.

Shift (Start and End Time): 12am-8am

Assigned Provider: Sam Rivera, DSP | Observed Mood: Calm

Overnight Monitoring: Staff performed overnight checks throughout the shift, tracking sleep quality and seizure status (Risk 2). The individual remained asleep and safe all night; no incidents occurred.

May 03, 2026 (Sunday)

Shift (Start and End Time): 8am-4pm

Assigned Provider: Jordan Lee, DSP | Observed Mood: Happy, Chatty

River Walk and Photo Review: Staff drove the individual to the river trail for a morning walk (Outcome 2, Routine Support 10). He took photos of the scenery and chatted happily about them on the way home. Staff encouraged water breaks twice during the walk (Risk 1). In the afternoon he reviewed his photos with a peer and helped make sandwiches for lunch (Outcome 4).

Shift (Start and End Time): 4pm-12am

Assigned Provider: Alex Morgan, DSP | Observed Mood: Calm, Content

Quiet Evening and Medication Pass: The individual enjoyed a quiet evening watching a nature documentary. Staff administered his insulin as prescribed and logged the medication pass (Routine Support 3). He voiced no complaints of pain or discomfort. Staff observed him at dinner for swallowing difficulty (Risk 2, Potential Risk 2); the meal proceeded safely.

Shift (Start and End Time): 12am-8am

Assigned Provider: Sam Rivera, DSP | Observed Mood: Sleepy

Overnight Safety Checks: The individual went to bed after his hygiene routine. Staff conducted hourly night checks, monitoring breathing and seizure status (Risk 2). He slept through the night and woke briefly once for water, returning to sleep without difficulty.
